DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-97 and 113-114 are drawn to a method of encrypting a set of data, classified in class 380, subclass 210.
- II. Claims 98-113 and 115-142 are drawn to a method and apparatus of forming an image of an object, classified in class 359, subclass 35.

The inventions are distinct, each from the other because:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility because the method for encryption can be done without the apparatus forming an image of an object of invention II. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by

Art Unit: 2137

their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reason(s) given above, restriction for examination purposes as indicated is proper. A complete response to this requirement must include an election of the invention to be examined, even if the requirement is traversed.

Conclusion

A shortened statutory period for response to this action is set to expire one month (not less than 30 days) from the mail date of this letter. Failure to respond within the period for response will result in ABANDONMENT of the application (see 35 U.S.C. 133, M.P.E.P. 710.02, 710.02(b)).
